WORK EXPERIENCE

Senior Data Analyst

Ross Industries

2023 - current / New York, NY

- Architected Snowflake reporting layers that unified plant, inventory, and margin data, uncovering \$102K in avoidable freight and rework exposure.
- Developed Looker dashboards that enabled plant leadership to monitor and adjust throughput, scrap, and fulfillment trends, accelerating decision-making processes during operating reviews.
- Generated detailed reports on output risks, demand shifts, and cost drivers for senior stakeholders, guiding budget reallocations to *enhance quarterly financial forecasts*.

Data Analyst

Liberty Mutual Insurance

2021 - 2023 / New York, NY

- Queried policy, premium, and claims data in SQL to identify a 12% drop in renewal conversion across a high-volume auto segment.
- Published Metabase dashboards that enabled real-time monitoring of loss trends, quote activity, and service-channel performance for 53 business partners.
- Refined pricing models with underwriting leaders using predictive modeling and regression analysis, reducing underwriting risk and *increasing portfolio profitability* across 212 client accounts.

Reporting Analyst

Chegg

2020 - 2021 / New York, NY

- Streamlined recurring enrollment and support reporting in Excel, *saving 7 hours* each week in manual QA and distribution work.
- Tracked learner behavior in Mixpanel across 13 onboarding and engagement paths to identify early drop-off patterns.
- Summarized subscription, usage, and support trends into concise updates that made performance issues easier to spot.
